

## EVO<sup>®</sup> ALTA<sup>™</sup> Skyworker<sup>™</sup>

ARC170-000-1AN / ARC170-001-6AN / ARC170-001-1AN

White | ARC170-000-1AN

Orange | ARC170-001-6AN

Black | ARC170-001-1AN

## DESCRIPTION

The new EVO<sup>®</sup> ALTA<sup>™</sup> offers all-round impact protection. Featuring a specialised shell structure and internal liner to increase durability and shock absorption performance.

EVO<sup>®</sup> ALTA<sup>™</sup> Skyworker<sup>™</sup> is certified to the EN 12492 mountaineering helmet standard with a 4-point chinstrap designed to stay secure under force, maximising security during a fall.

Precise adjustment settings enable a secure fit, ensuring the helmet remains stable.

Engineered to maximise compatibility and accessory integration, EVO<sup>®</sup> ALTA<sup>™</sup> is an adaptive system with built-in attachment points and an interchangeable front module.

- SAFETY STANDARDS
  - EN 12492
  - AS/NZS1801

## FEATURES

- EVO<sup>®</sup> ALTA<sup>™</sup> provides all-round impact protection with top, side, front and rear shock absorption performance. The helmet is designed with an extended nape section to offer greater neck coverage.
- The EVO<sup>®</sup> Alta<sup>™</sup> range maximises compatibility and accessory integration. Attachment points on the helmet shell enable firm fitting of ear defenders, faceshields, goggle and lamp straps, plus a range of other accessories.
- The Revolution<sup>®</sup> Flex wheel ratchet harness secures the helmet, eliminating pressure points to provide maximum comfort. Fitted with a replaceable Chamlon<sup>™</sup> cotton sweatband and fully compatible with EVO<sup>®</sup> cooling sweatbands for protection against heat stress.
- The 4-point chinstrap is easy to adjust. Size and anchorage point adjustment enable a tailored fit for different head sizes, ensuring stability and greater comfort.
- Side and rear ventilation in the helmet's shell and liner reduce temperatures by an average of 2-3 degrees.

- EVO<sup>®</sup> ALTA<sup>™</sup> features a unique interchangeable front module. Select the integrated ID card holder for on-site identification or choose the logoready standard front to apply company branding. Both front modules enable attachment of a helmet lamp and other accessories.
- Featuring an internal impact liner to increase shock absorption and penetration protection. Manufactured in expanded polypropylene (EPP), the liner is lightweight and ventilated for comfort.
- The harness cradles the head to keep the helmet stable with an adjustable 4-point chinstrap for increased security. 3D-Adjustment depth settings enable the most precise fit attainable on a safety helmet.
- Helmets can be customised to meet a corporate identity. Logo printing is available on the front and sides of this safety helmet, helping to increase brand recognition and discourage theft. MOQs apply.
